Alexandria 19th Oct. 1801

Dear Sir,

I observe it is stated in the Public Prints, that you have communicated to Dr. Waterhouse the success of the Vaccine matter in your family, and having been applied to by my Medical friends of Ken¬
—ucky and Tennessee for information on this subject, and for a supply of the infec¬
tion, I would be grateful in being in¬
formed whether you caused any of those persons, were inoculated with this matter
to exposed to the Variolous infection and the success of the experiment. Also, where a supply of the first mentioned infection can be had. With very assurance of the highest respect & esteem I am Your obt. very humble Servt. Henry Rose
