Cincinnati, Friday, Dec. 26th 1855.

Mr. Rott. Jfr. My dear Friend,

I delayed this letter until this morning. I got a letter this morning from our health friend Mr. Jfr. M. Clendenon, enclosing a copy of the Constitution and Articles. I will send under the head "Pacific Force" by the fire in Section 6. P. 12. The authority for having a paid under-secretary of our business, namely by him, where it says paying the expenses of any agent employed in the public business, etc.,

You will see also the beauty of having this office from the 7th section in p. 13. Such duties should or security must correspond with the Supreme Director through its or their proper officers. This office can concentrate all our business as a central and available point. Instant action is taken in all matters, treaty, object, communication, and the danger of collision with the D.D. avoided. Concentration + 林立 = action case.
The secrets of the success of all great movements, and the secrets of success of all great men, whether in war, in commerce, or any other relation of life—what is provided they are controlled by proper principle, and the means adapted to secure the end.

Don't broach the motto will live.

"Because you are right, then go ahead."

You will notice in the future of the 29th inst. the most searching reply to Dr. Trench's article (8th inst. in the Irish American) by Messrs. Holpin & Kerfoot.

I declined this. A wild shot. Can't trust any of them. Hope this controversy will cease. The more the transgressors this matter up the less justification the harder they will set. Holpin & Kerfoot can handle any of them.

I have not written to Dr. Smith to give my views on this office or Under Secretary. I have no doubt he will agree to it.

If you are writing to him please home it.

Any other friend of the Coasting Tonsard would be better to about it. I will leave this to..."
You. I will write to Mr. Smith myself in a few days. Three of the S. I. are sufficient to establish this office.

How absurd it is to think of you & I going to try off to Providence to see the bearing of matters! - but if in N. Y. you can there in a few weeks & you can be there in 4 days at any time, besides, think of the monstrous story that Dr. McGowan would take upon himself to discharge! - and even if discharged, the disjointed action arising out of the locality. Providence in R. I. for head quarters. Such a mighty movement as this is destined to be. It is not within those it is.

Write me soon. The Yundance.

The ever yours,

L. Frenn.
