My dear Sister:

I have apologies, as you see well known, no doubt, that I have been on the level of a list for two months or more. I will tell you that just cropping up all my deficiencies. During my illness, I have been completely disabled, dispirited, that supplicated much pain. Exactly the nature of my ailment is more than I can tell, so my doctors then my impediments is that it is of the nature of the maximum or nervous, but the doctor thinks it all proceeds from a disorder in liver. At all ens.

The pain in my left shoulder I have over these items, the heart has been expensive, depriving, you sleep, quiet, rise his joy for a portion of the
officers we have great confidence in their success. Mrs. Smith employs a very able draughtsman, and you can yet make us a fair visit in season to see them with her. If you will come promptly, Mrs. Smith will fill some good lecture and suitable company on board. Indeed, it is

true that your spirit of adventure and love of new scenery are a good deal like Virginia's. But it's no use discussing the matter.

Well, we have a rule, I think both look better and when they learned all the rules, they have come knowing some of their arts occasionally. Changing with the day, as I understand them both better than I found them at the very start of their career, and they are changing.

Why did you not come with Mrs. Thompson? I made us a visit? I would have been so very happy, at the same time such a surprise isn't joy to us. That we are surrender at 8 a.m. your request. By the way, March is not a very favorable month for pleasant excursions at sea as Mrs. Thompson, for the inclement the roughest weather, according to the Captain's estimate, that has been engendered for two years. Our Henry has a very shrewd, business-minded, and very

much better thinking than the most competent experienced.

As with the rain and the cloud, the sun at last, as seems to be the case, they have made some real progress. They have attained a thorough knowledge of the structural principles of their language--while on the latter, the comparatively fixed and the firm basis of their results under the sign that is a negative quantity in Mathematics. They both show much much better thinking. It is more careful and patient study.
