J. Smith's death rate from tuberculosis most alarming. Twice the number of the average cities of 15,000 size.

We must help by reporting any house vacated by a patient who has it in last illness or who has died from it. This house should remain open for a length of time before it is permissible to be re-leased.

We should visit the county hospital to help educate the people.

Dr. Robertson,

Care of children's teeth.

Some commercial institutions, factories etc are employing dentists and mouth surgeons to administer free work to employees to raise standard of efficiency. 90% have dirty mouths and teeth. A clean mouth never decays.

Acid saliva combined with decaying food particles erode enamel to enter the tooth and apparently the tooth goes all at once when in fact it has been coming on gradually. Children should acquire habit of a clean mouth.

The 1st permanent teeth coming at 6 years of age must be carefully watched as most mothers think they are just part of the baby set and are often neglected beyond repair in early childhood.
Judge Hill -
Every case of tuberculosis should be segregated. Their names and residences should be known and should be avoided as those suffering from any other communicable disease. Children and young people much harder to cure than adults.
We must force by public opinion the physicians to report all cases. The county hospital supphome could be converted into an ideal sanitarium by furnishing a suitable rooms and a two-room cottage for the attendant, and using the $10,000 residence adding screened porches and a few minor changes. Urged resolutions asking for a complete obedience of the law compelling physicians to report all cases to the City Com-

Mr. Clifford: I have just received a letter from my former employer, Mr. Belcher, expressing his concern about the state of the factory. He is planning to visit your district next week to inspect the conditions there. He will also ask for a report on the progress of the strike.

With regards to the matter of the strike, I believe we should act promptly to resolve the conflict. It is important to ensure the safety and wellbeing of all workers involved. I propose that we hold a meeting with the strike leaders to discuss possible solutions.

As for the strike itself, I understand your concerns about its continuation. However, I believe it is crucial to address the grievances of the workers. If we can find a way to satisfy their demands without resorting to violence, it may help to end the strike.

I am also concerned about the economic impact of the strike on the town. It is important to find a balance between the rights of the workers and the needs of the business. I will do my best to mediate between the two parties and find a resolution that meets both their interests.

Please let me know if you have any other suggestions or concerns. I am committed to finding a peaceful solution to this matter.
