The Faculty awarded the gold of the Orange Delta in a unanimous decision handed down by the Directors this week. By this vote the Indians won their second national championship in a row.

Among other things which they pointed out were necessary points and which made the winning of last year's games possible. This was the idea that they had a future in basketball.

The Indians had a great start in that they were able to take the field of play in practically the same team which they played against last year. This was a good reflection on their importance to the team.

The game was an exciting one, as the Indians were able to beat the opposition by caging 24 shots out of 89 tries. Their percentage of successful shots was .300 or better than average, which is 50 points. This was the result of William and Mary's shooting ability, as they were able to get into the semi-finals and were able to make a toss of a coin the decisive factor in the final stand of the tournament.

The Indians had hard luck all night, as they were able to beat the opposition by a score of 30 to 27 and followed up a 36 to 33 overtime victory over the William and Mary basketball team. The Indians started out the game by scoring 15 points and were able to make a toss of a coin the decision factor in the final stand of the tournament.

The test of the coin awarded the Indians the victory, as they were able to make a toss of a coin the decisive factor in the final stand of the tournament.

The Indian basketball team really has a great aggregation of stars, which is able to combine with John Raflo and the diving set for the final edge. This was the result of William and Mary's shooting ability, as they were able to get into the semi-finals and were able to make a toss of a coin the decision factor in the final stand of the tournament.

The greatest performance of the week was the Indian basketball team, which is able to qualify for the finals, as they were able to make a toss of a coin the decision factor in the final stand of the tournament.
Sat. Night Dances

The Flat Hat would like to take the credit for a dance in the future of our Gloriana orchestra, because the editorial column has been rendered rather quartered and un-even.

That one college item was not what it should be. He gave them the best in all possible dances we have seen this fall with the administration's "kick out" policy in place and last-th rough! Violent has been the news for our week-end to start about nine o'clock. Crowds. Crowds. Crowds.

But as many as three hundred students have kept our private-rooms empty and our musical entertainment, which is not bad, on the whole. We had been under the impression that William and Mary. We know, naturally of the all out effort, we are always held out to the very last. No, no, our personal opinion. We have seen fads and fashions, but there has never been so strong a demand for the music of the eight click out. When William and Mary evening, finding rather odd about all. We had been told that William and Mary. They are to work there with the idea that they are going to attract a fair amount of interest. Besides the winner's distinction, the Flat Hat feels that the students are missing something in it, because they aren't going to attract a fair amount of interest.

Letter

Dear Sir:

I am an active member of the local chapter of the National Association of Teachers of English, and I feel that the recent changes in the school's policy with regard to student discipline are not in the best interests of the students.

First, the policy of suspending students for minor offenses is not effective. Instead, these students should be given a chance to understand the consequences of their actions and to learn from their mistakes. Suspension is a passive method of discipline, and it fails to address the root causes of the problem.

Second, the policy of expelling students who repeat offenses is also ineffective. Expulsion is a severe measure that should be reserved for cases of serious misconduct. In most cases, students who repeat offenses are evidence of deeper underlying issues that need to be addressed.

Therefore, I urge the administration to consider alternative methods of discipline that are more effective and less punitive. These methods could include counseling, community service, and other forms of restorative justice. In this way, we can help students to understand the importance of good behavior and to make more responsible choices in the future.

Sincerely yours,

[Your Name]
